

Final Assignment Proposal

Data Sources:

- Social Data: Tweets API

Questions:

- How far and how long can big events/news influence the world?
Using data on Twitter, visualize how many people talk about an event/news and how long people keep talking about this topic. show the influence of the event/news.
- What's the relationship between different events/news?
Select several top events/news during a period of time, using data visualization to show the influence of different news/events. If another event/news happens, will the influence of the previous event/news be diminished?

Python Libraries Used:

- Pandas
- Numpy
- Matplotlib
- Geoplotlib
- Basemap
-

Visualization Type:

- map
